<u>Carrying Rack for 5"</u>	-	\$126.95	\$126.95

Pump Pond Water Free of Debris

The Float Dock strainer is a valuable piece of equipment that can save the day in many fire fighting situations. Float Dock lets you use the water in ponds or streams, both shallow and deep. Because it operates below scum and debris and above sand and muck, it screens out the materials that wear out impellers, packing and bearings. Since Float Dock strainers are self-leveling, there are no whirlpools or suction loss. The Float Dock drafts in as little as 5" depth without any whirlpool or loss of suction. For Deep Drafting it drafts from a few inches below surface where water is clean. Hose weight tilts strainer position while float remains level. Each unit is fully guaranteed. Optional carrying rack available.

Coupling size will determine float dock size; see chart below. Please specify coupling size.

Strainer	Float	Coupling
6"x8"x18.5"	7"x21.5"x26.5"	5"
7"x10"x18.5"	7"x21"x26.5"	6"

Carrying Rack: Float-Dock strainers fit snugly in this lightweight carrying rack with rubber bumpers and live-rubber strap to hold the unit securely in place. Mounts either on running board or inside a compartment
